Design Coordination

Streamline Coordination

Get to "clash-free" faster and prevent rework before construction even begins.

— **25 WORD DESCRIPTION**

Design Coordination helps you streamline the coordination process, connecting your VDC, Design, Operations, and Field teams to improve project performance and predictability.

— **50 WORD DESCRIPTION**

Bridge the gap between VDC, Design, Operations, and Field teams in one centralized hub - allowing you to leverage the knowledge of all collaborators and improve project performance and predictability. Get to "clash-free" faster and prevent rework before construction even begins.

— **100 WORD DESCRIPTION**

Bridge the gap between VDC, Design, Operations, and Field teams in one centralized hub - allowing you to leverage the knowledge of all collaborators and improve project performance and predictability. Elevate any issue in Design Coordination to an RFI within our platform and attach issue context to simplify communication. Detailed performance dashboards provider greater accountability and visibility by highlighting which trades are falling behind - helping you get to "clash free" models faster.
