Procore for Commercial Construction

Construction starts in the U.S. are expected to rise approximately 10 percent in 2015, a rate almost double that estimated for 2014, according to the "Fourth Quarter 2014 USA Construction Cost Report." To service this growing market need, construction firms look to Procore.

PROJECT: **Eagles Stadium, Pennsylvania**

Win More Work

Keeping projects on schedule is imperative to profitability, and avoiding delays requires every party to deliver their work on time. Without the ability to monitor deadlines and anticipate delays in permitting, inspection, or obtaining equipment, valuable time and resources are lost.

"Over the last year we were able to increase our sales by over sixty percent and we know that without Procore we wouldn't be able to handle that amount of work."

SYLVIA LAMAS
Controller, Wells Constructions, Inc.

Procore helps firms drastically increase project efficiency and accountability by streamlining and mobilizing project communication and documentation. Around-the-clock accessibility to project data minimizes costly risks and delays, ultimately boosting profits.

Clients that use Procore demonstrate to their customers the investment they've made in project management and risk prevention—arming them with a competitive advantage to win more business.

PROJECT: **600,004 SF Rail-Accessible Tilt-Panel building on 49 acres, with 46 truck bays and 20,000 track feet of rail**

All-in-One Platform

Procore's project management platform offers the core technologies necessary to manage projects from bidding to closeout, including:

• RFIs

• Submittals

• Document Management

• Drawing Management

• Meeting Minutes

• Transmittals

• Punch Lists

• Photos

• Scheduling

• Daily Logs

• Contract and Change Management

• Bidding

• Budgeting

• Contact Directory

• Email Tracking

• Scheduling Integration

• Timecards

• Standard and Custom Reporting

• API Integration

• Sage 300 CRE Accounting Integration

Benefits

- Real time access to project data from any Internet-connected device

- Consistent and auditable workflows and processes

- Improve field to office communications

- Reduce response times

- Increase efficiency and productivity of distributed teams

- Improve accountability with documentation, tracking, and record keeping

- Reduce risk, rework, and operational costs
