— 25 WORD DESCRIPTION

Procore's Labor Tracking equips contractors with simple mobile tools to expertly manage productivity and utilization of labor on the construction site.

— 50 WORD DESCRIPTION

Construction companies need better solutions to improve productivity and complete projects on time and on budget. Procore's Labor Tracking equips contractors with simple mobile tools to expertly manage productivity and utilization of labor on the construction site.

— 100 WORD DESCRIPTION

In the US, 98% of large projects are more than 30% over budget; most of these costs are attributed to labor. Globally, construction projects are growing larger and more complex. Yet over the past twenty years productivity improvements in construction have remained flat. Construction companies need better solutions to reduce real costs and waste on projects, leading to improved productivity and project performance. Procore Labor Tracking equips contractors with simple mobile tools to expertly manage productivity and utilization of labor on the construction site. From the field to the corporate office, it delivers real-time access to decision driving data for managing projects on-time and on budget.
