

The highest quality build in a safer environment.

Understand, correct, and predict issues before they become a problem.

See what happens when everyone plays their part.

Procore is built for the field, making it easy for field staff to contribute to and comply with safety regulations and quality specifications.

Identify the root of the issue.

Pinpoint and problem-solve quality and safety issues with real-time visibility into risky behavior, near misses, and incidents.

Focus the resources you have on improving.

Identify and track opportunities to reduce risk with easy-to-read reporting and dashboards.

“Due to the proactive approach we take using Procore’s Inspections and Observations tools, we’ve been able to reduce punch list items by up to 97%.”

ERIK FELD

Director of Technical Operations, TruEdge Builds, Inc.
