

You're in Good Company

Here's why Procore is the construction management platform of choice for concrete contractors.

The solution built for you.

Procore's all-in-one solution helps you minimize risk and maximize profitability.

- + Mark up, review, and track changes to formwork and reinforcing steel shop drawings and specs—whether you're on or off the jobsite
- + Boost field-to-office communication and prevent project delays by giving teams greater visibility into how the job is progressing on site
- + Avoid rework with access to RFIs and change orders in real time, and ensure everyone is working off of the same accurate, up-to-date information
- + Get paid for the work you do and eliminate any question about work completed by owning all of your data
- + Leverage customized dashboards and reporting for real-time insight into quality, safety, and labor productivity

With Procore, you can expect:

- + Intuitive and user-friendly tools
- + Mobile solution with offline access when you're in WiFi-free zones
- + Automated workflows
- + Unlimited customer support
- + Unlimited users for enhanced collaboration
- + Real-time access to drawings and documents
- + One location for all project information

Don't settle for less than peak performance.

Gain access to up-to-date drawings, boost field-to-office communication, and keep track of work completed—all from one centralized location. Learn more at www.procore.com/specialtycontractors.
